EZ SOLAR MOUNT CLAMP ON

STANDING SEAM METAL ROOFS ARE NOT CREATED EQUAL.

There are many standing seam profiles which means it is impossible to have a one-size-fits-all approach. TRA Snow and Sun's **EZ Solar Mount Clamp On** fits many standing seam metal roof profiles using a safe, reliable design that is customized for a secure fit. The **exclusive attachment system**, using under-the-hem clamping and bolting, provides superior strength while maintaining your manufacturer's warranty. Its attractive appearance and proven performance make TRA Snow and Sun's EZ Solar Mount Clamp-On ideal for both commercial and residential projects.

UL 2703 PENDING

EZ SOLAR MOUNT CLAMP ON

When it comes right down to it, a solar system is only as good as its mounting hardware. That's why when you need the highest quality roof mounting accessories and fastening systems, you turn to TRA Snow and Sun.

Built to last. Built to be reliable. Each and every component in our SOLAR MOUNTING LINE creates a perfect foundation for your solar solution.

"Their durability was unsurpassed. In fact they made their competitors' mounting systems feel downright flimsy. We will be using TRA Snow and Sun mounting systems exclusively for all our future projects."

Single Lock Profile

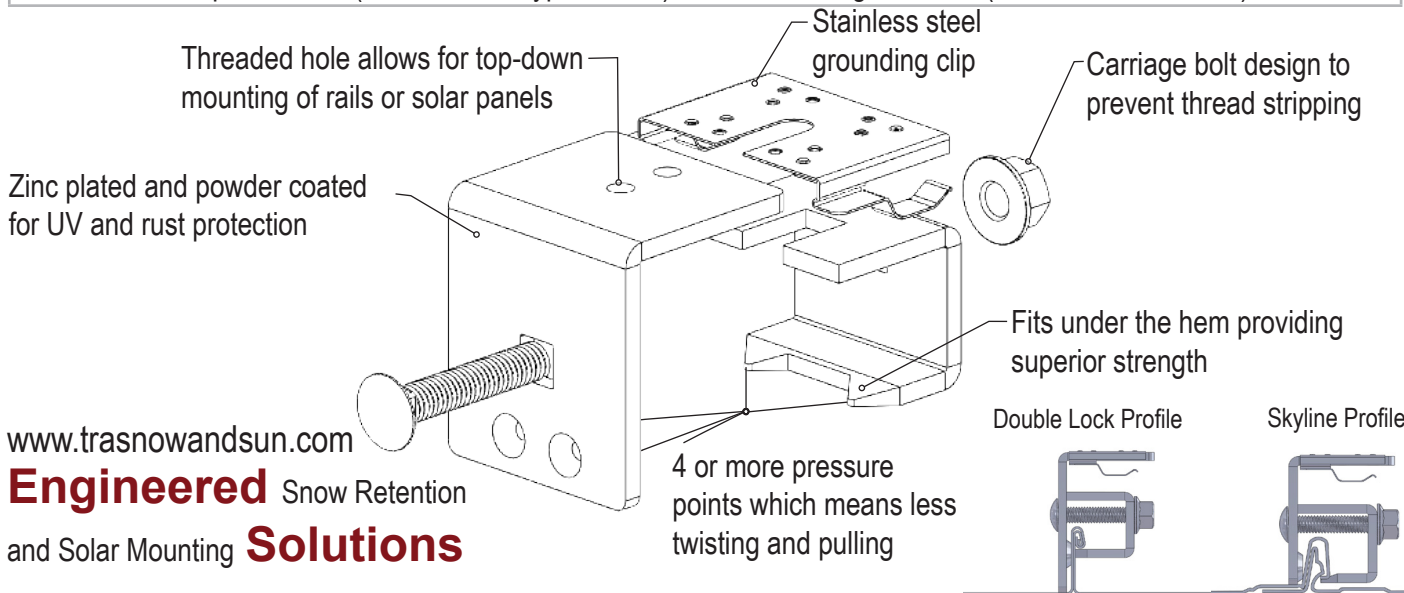

The chart below explains the features and benefits of our EZ Solar Mount Clamp On compared to others on the market.

Feature	Other Clamps	EZ Solar Mount Clamp On	Benefit
Attaches to the rib	√	√	Doesn't penetrate the roof surface
Greater surface area to mount the panel	√	√	No rails required
Top down assembly	√	√	Easy to install
Size/design	√	√	Fits the majority of solar panels on the market
Steel-to-steel, similar metals		√	No galvanic corrosion
Attaches below the hem		√	Ensures that clamp will not pull off the rib
4 or more pressure points		√	Added holding strength
Zinc plated and powder coated*		√	UV and rust protection
Custom built to fit all standing seam rib types		√	Fits to nearly every metal roof, including skyline panels
Carriage bolt design		√	Threads will not strip ; cannot over torque
Engineered to the fail point of the system		√	Holding strength that ensures it will not pull off the roof
No nut needed on the mid/end clamp		√	Cost savings

Material :: 3/16" Steel (ASTM A709 GR 36) *Powder coating is available on request

Allowable Load (lbs) :: Uplift: 300-500 (Dependent on the panel securement)

Finishes :: Zinc plated steel (ASTM B633, Type II, SC3), Powder coating available (RAL Standard Colors)
