

## SNOW BLOCKER 3 (PURLIN)

### USED ON: MOST ROOF TYPES NEW CONSTRUCTION OR RETROFIT

#### DESCRIPTION

- Fastens to purlin
- Installed using (4) #14 structural screws (recommended fasteners sold separately)
- Can be powder coated to match roofing material color
- Ice Flags (recommended)
- Butyl applied under the snow blocker (optional)
- Designed for 1.0" OD tube
- Overall dimensions: 4.45" L X 1.75" W X 7.32" H

#### MATERIALS

- Steel: 3/16" (ASTM A1011 & ASTM A880)
- Copper: 1/4" (ASTM B152)
- Weathering Steel (known as CORTEN®): 3/16" (ASTM A588)
- Stainless Steel: 7 gauge (ASTM A304)

#### COLORS/FINISHES

- Uncoated Steel
- Zinc Coated
- Powder coating available in many colors visit <http://trasnowandsun.com/color-chart/> to see color chart

**NOTE:** Due to specific job conditions, TRA Snow and Sun will only warranty a snow retention system/layout that has been designed by TRA Snow and Sun.

**DIMENSIONS**  
DO NOT SCALE

#### INSTALLATION:

TUBE(S) MUST NOT EXTEND MORE THAN 6" PAST THE FINAL MOUNT.

PLACE COLLAR(S) INSIDE OF THE MOUNT AT THE END OF EACH FENCE SECTION. TORQUE SET SCREW(S) TO 5 LB-FT.

INSTALL USING FOUR #14 STRUCTURAL SCREWS PER SNOW BLOCKER, IN PATTERN SHOWN IN DETAIL, ON THE UP-SLOPE SIDE. ALL SCREWS MUST PENETRATE THE PURLIN.

Align the Snow Blocker according to the TRA-designed layout. Flashing/waterproofing brackets as necessary (proper flashing techniques and waterproofing methods not provided, please consult with local waterproofing codes). Install using four #14 structural screws per snow blocker, in pattern shown in detail, on the up-slope side. All screws must fully penetrate the purlin.

After installation, flashings may be fabricated and installed at the installer's discretion based on site-specific needs. All roof penetrations through the underlayment must be properly flashed or sealed to maintain the integrity of the roofing system. For added protection, TRA Snow & Sun offers an optional butyl that can be applied beneath the Snow Blocker.

## SNOW RETENTION SYSTEMS
